STAINED GLASS

STAINED GLASS

Cathedral

Simulates old style crafted stained glass with lead, for a “cathedral effect”. Glass is always matte.

Regular

Has three types of transparencies that can suit almost any application. Opaque, zero to normal light transmission.

Construction of Cathedral glass

First Layer: Clear, high quality glass.

Second Layer: A special vinyl containing the image, which also makes it safety glass so that the art will not shatter into pieces if struck with a heavy blow.

Third Layer: Matte glass that creates a “cathedral effect”.

Construction of Regular glass

First Layer: Clear, high quality glass

Second Layer: A special vinyl containing the image, also makes it safety glass so that the art will not shatter into pieces if struck with a heavy blow.

Third Layer: Clear, high quality glass.

If the application is not for a window or an ornamental picture for the home/office, etc (i.e. for a door), then the glass must be thicker. Please specify when ordering this.
